PERSONAL DETAILS

Date of Birth: 28.03.2005 | **Nationality:** Indian | **Marital Status:** Unmarried

ABOUT ME

A motivated Digital Business and Data Science student at the University of Europe for Applied Sciences, Hamburg, with practical experience in data analysis, process automation, and IT operations. Proficient in Python, R, and Java, holding certifications from Google and TCS, and seeking an internship to contribute meaningfully within a dynamic, international organization.

EXPERIENCE

Working Student

02/2025 – Present

Sidhu Hamburg GmbH, Hamburg, Germany

- Managed and maintained local IT infrastructure including POS systems, printers, and LAN and WLAN networks.
- Built small automation solutions using Google Apps Script and Excel macros to streamline shift planning and inventory management.
- Supported the rollout of new digital tools including online ordering systems and kiosk technologies.

Data Entry Clerk

07/2023 – 08/2024

Shubham Enterprises, Jalandhar, India

- Input customer, vendor, employee, or financial data from source documents.
- Used keyboard shortcuts to speed up data entry.
- Entered data into web-based CRMs or ERP systems.
- Applied dropdowns, data validation, and templates to reduce errors.
- Maintained logs of daily input and output volumes.

PROJECTS

World Cup Dataset (K-Means and Hierarchical Clustering)

05/2026 – 06/2026

Tools: Python, NLTK, Matplotlib

- Applied K-Means and hierarchical clustering to segment survey respondents by World Cup engagement and preferences.
- Used the elbow method to determine an optimal cluster count and standardized features to ensure fair distance-based comparisons.
- Analysed and interpreted five distinct fan segments, from highly engaged supporters to distance-sensitive respondents.
- Evaluated clustering suitability for small, discrete survey data and documented key limitations of the approach.

Random Forest: Machine Failure Prediction

04/2026 – 05/2026

Tools: Python, NLTK, Matplotlib

- Built a Random Forest classifier to predict machine failure from 10,000 industrial sensor readings across 14 features.
- Addressed class imbalance (approx. 3.4% failure rate) using balanced class weighting to prevent the model from ignoring rare failure cases.
- Engineered features by encoding categorical variables and removing leakage-prone columns to ensure valid predictions.
- Evaluated model performance using a classification report, confusion matrix, and accuracy score on a held-out test set.

NLP Text Preprocessing Pipeline

03/2026 – 04/2026

Tools: Python, NLTK, Matplotlib

- Built a modular Python tool to automatically clean and analyse real text data.
- Processed a real WhatsApp chat (4,940 messages) using tokenization, stemming, and stopword removal.
- Extracted the top 20 most frequent words and visualized them in a professional bar chart.
- Designed the tool to work on any text dataset, not just WhatsApp chats.

Analysis of Forest Performance

03/2025 – 05/2025

Tools: Python, Pandas, Matplotlib, R-Studio

- Comprehensive analysis of forest datasets to identify key environmental and human factors influencing forest health.
- Applied statistical methods and visualizations to uncover trends in deforestation, biodiversity, and climate impacts.
- Communicated insights through data storytelling with Python and R to support better decision-making.

EDUCATION

Bachelor of Science in Digital Business and Data Science

09/2024 – 09/2027 (Expected)

University of Europe for Applied Sciences, Hamburg, Germany

Relevant Coursework: Big Data and Analytics, Human Resource Management, Employability Soft Skills and Business English, Financial Accounting and Reporting, Marketing and Sales, Economics, Digital Media and Communication, Artificial Intelligence and Frontend Programming.

Vocational Course in Data Science

04/2023 – 06/2024

Apeejay College of Fine Arts, Jalandhar, India

Relevant Coursework: Big Data, R, MS Access, Internet of Things (IoT).

Higher Secondary School

04/2021 – 03/2023

Innocent Hearts School, Green Model Town, Jalandhar, India

Relevant Coursework: Physics, Chemistry, and Mathematics.

CERTIFICATIONS

- Programming course in C, C++, and Python from Innovative Techno Institute (2023–2024)
- German Language Course (A1–B1) from Goethe-Institut, New Delhi (2023–2024)
- Introduction to Generative AI from Google (Badge)
- Data Visualization: Empowering Businesses with Effective Insights from Tata Consultancy Services
- Advanced Java Course from Udemy

IT KNOWLEDGE

Microsoft Office

Excel, Word, PowerPoint, Outlook, Access

Programming Languages

Python, C, C++, R, R-Studio, Java, SAS

Tools & Platforms

Jupyter Notebook, Anaconda, VS Code, NLTK, Pandas, Matplotlib, Google Colab, Jira, Miro, Canva, IoT

LANGUAGES

English: C1 (Fluent)

German: B1

Hindi: C2 (Mother Tongue)

Hamburg, 22.06.2026
